Description: How to replace batteries.

If you need to replace the batteries in your Innova 5610, we're here to guide you through the process step by step.

Purpose:

This guide is designed to help you understand where to place or how to replace the batteries in your Innova 5610.

Battery Replacement:

You'll need to replace the batteries under the following circumstances:

•The battery symbol is visible on the screen display.

•All three LED lights are lit, and no other data is visible on the screen.

Follow these Procedures:

Step 1: Locate the Battery Cover

1.Turn the Innova 5610 over to the backside where the battery cover is located.

Step 2: Open the Battery Cover

1.Using a screwdriver, gently open and slide off the battery cover. This will expose the battery compartment.

Step 3: Replace the Batteries

1.Inside the battery compartment, you'll find the space to insert batteries.

2.Replace the old batteries with three AA-size batteries. For a longer battery life, it's recommended to use Alkaline-type batteries.

Step 4: Reinstall the Battery Cover

1.Once you've replaced the batteries, carefully place the battery cover back over the compartment.

2.Use the screwdriver to secure the battery cover in place.
